## Preface

The Annual Dzongkhag Statistics of Haa is the first in the series of publications. It attempts to provide comprehensive statistics of Haa Dzongkhag and will be published annually.

The report contains statistics on demographic and socio-economic, environment, culture, local governance and infrastructures of the Dzongkhag. The statistical data for this publication are collected and compiled from various sectors and through primary sources.

We hope that this report will serve as a source of information and guiding tool for micro-level planning and decision-making in the Dzongkhag. Statistics office, Haa would like to thank and acknowledge the support and cooperation of all sector heads concerned for providing timely information for this report. Without their support, this publication would not have been possible. Through this initiative, we also hope that the maintenance of sectoral information and updation in the Dzongkhag will become more systematic and efficient henceforth.

Since this report is the first publication and with information source being from numerous sectors, we expect there may be certain deficiencies in terms of coverage and updation. However, there will be continuous efforts made to improve its coverage and quality in our future publications. Your comments and suggestions in this regard will be highly appreciated.

## Background

Haa Dzongkhag is situated at an elevation ranging from 1000 to 5600 meters above the sea level. It is surrounded by Tibet (China) in the north, Samtse in the southwest, Chukha in the southeast and Paro in the east respectively. The total area of the Dzongkhag is 1899.02 Sq. km. with a projected population of 12, 588 in 2010.

The Dzongkhag has one Drungkhag and six Gewogs; namely Bji, Katsho, Eusu, Samar, Gakey-ling and Sombaykha. The Sombaykha Drungkhag was created in 2007 to address the constraints faced by the people of 2 Gewogs of Gakeyling and Sombaykha, owing to distance factor from the Dzongkhag Headquarters.

The Dzongkhag is characterized by rugged and mountainous terrain. Topographically, Bji, Katsho, Eusu and Samar Gewogs are located in the north, while Gakeyling, Sombaykha, and Sektena and Fentena of Samar Gewog are located in the south. The two are separated by Tergola and Selala pass.

The vegetation ranges from broad leafed forest in the southern Gewogs to coniferous and sub-alpine in the central, and pure alpine vegetation in the high lands of northern Gewogs. The Dzongkhag is endowed with rich flora and fauna and about 68 percent of its area is under forest cover. It has cold and dry winter and wet and warm summer. In winter, the temperature drops to minus seven degree Celsius. The Dzongkhag experiences snow fall several times in a year starting from late October till April.

Haa has a total cultivatable agricultural land of only 2 percent of its total area. Most are dry and pasture land. Majority of the people depend on livestock and trading activities. Wheat is the main cereal crop grown in the Dzongkhag, and other crops include barley and buckwheat. In the south, cardamom and ginger constitute the principal cash crops and potato in the north. However, apples and vegetables are also grown on a moderate scale.

The Dzongkhag has 1 higher secondary school, 3 lower secondary schools, 3 primary schools and 2 community schools with a total enrolment of 3,327 students in 2010. The Bali BHU-I functions as Dzongkhag hospital, and has 3 grade II BHUs. Wangchu Lo Dzong Military Hospital also provides health services to the people of Haa Dzongkhag.

Haa has 40 Lhakhangs and is known for “White Poppy” which is one of the rare species in the country. It was opened for tourism in 2002 following the resolution of the 79th session of National Assembly.
